Plastic Locker

LOCKERMANIA[®] Professional ABS Plastic Series
www.lockermania.cl

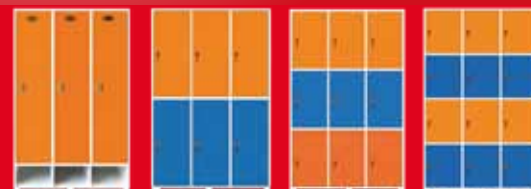

Plastic locker offers a vast improvement over conventional metal lockers in certain environments.

It has excellent performance in areas of heat, damp and salinity. They are exceptionally easy to clean with simple soap and water suitable for modular assembly

These lockers are available in a vast becoming more popular in outdoor damp and cold environments without fear of rust and can be cleaned with a high pressure hose.

- ☑ Recyclable
- ☑ High Strength

What are we different from other “ABS Lockers”

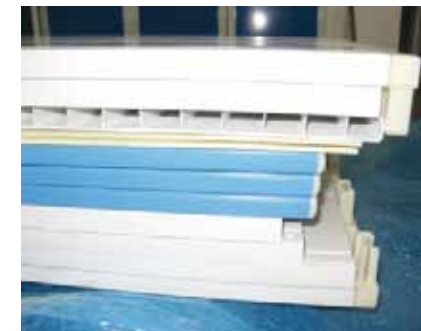

As we all know ABS material is very strong but also high in price. While some company use Polystyrene (PS as we know) to fake ABS but we do not. We use PVC made body & ABS made hard part such as corners, base, supports, hooks, hinges and etc. Fully plastic, NO steel bolts at all.

Bright Color, Never Fade

We made our locker body as one time forming, 20mm thickness hollow inside which makes the body standing strong caring enough for goods inside.

PVC with one time forming

Incorporation dyestuff into the machine with PVC material and made bright colors. This color would never fade even after several years

ABS Part

ABS mould part which other parts with PVC glue to support and connect PVC body, door, panel, side panel and etc parts. It's strong enough so no need worrying about the working period.
